Figure S1  Distribution of polymorphisms in strain 3921. A) Supercontig 1, B) Supercontig 2. The location of tng is indicated by a vertical arrow, C) Supercontig 3, D) Supercontig 4, E) Supercontig 5, F) Supercontig 6, G) Supercontig 7, H) The region from 513651 to 1551100 on Supercontig 2. The location of tng is indicated by a vertical arrow. Total SNPs are plotted in blue. SNPs that are unique to strain 3921 are plotted in red. Indels are plotted in green. Polymorphisms were sorted by Supercontig and position and the total number in a 10 kb moving window is plotted on the Y axis. The X axis corresponds to the position along the Supercontig.
