Figure S9. Expression of protein from GMR>eGFP::Brd (green) in mosaic larval eye discs containing clones of mutant cells homozygous for Pasha alleles Q394X (A), Q83X (B), Q579X (C), P203L (D), A13 (E), and R59X (F). Mutant cells are marked by the absence of RFP protein (purple); cells with one or two copies of the wildtype Pasha allele express RFP.
