Figure S3  The H3K27me status on the stg gene (A; Region surveyed: 3R:25064521..25114520) during the WPP stage (B) and in Drosophila SL2 (C), Kc (D) and BG3 (E) cells. Note the enrichment of H3K27me3 in stg locus during the WPP stage (B), and the enrichment of H3K27me1 in stg locus in SL2 cells (C).
