| GOTERM BP  | GO:0051248 negative regulation of protein metabolic process          | 5                  | 1.49E-02 | Acp76A, PEK, Spn77Bc, nos, elav  |
| SWISSPROT PIR  | translation regulation   | 3                  | 4.00E-02 | PEK, mRpL11, nos   |

<sup>a</sup> Categories used in DAVID analysis include GO sub-ontologies for Biological Process (BP), Molecular Function (MF), and CC (Cellular Component), as well as keywords from SwissProt PIR (Protein Information Resource) and protein domains from the Interpro database.

<sup>b</sup> Count represents the number of gene families

<sup>c</sup> Gene symbol for representative, most highly annotated member of each gene family is shown. All annotations shown here are from *D. melanogaster*.

|           |   |   |          |                                       |
