

Figure S2 Tissue-specific correlations between *mirr* and *Men* expression. *mirr* and *Men* gene expression in the abdomen of (A) both *MenEx60* and *MenEx58* heterozygotes, (B) in heterozygotes of *MenEx60* alone, and (C) in heterozygotes of *MenEx58* alone; in the head/thorax of (D) both *MenEx60* and *MenEx58* heterozygotes, (E) in heterozygotes of *MenEx60* alone, and (F) in heterozygotes of *MenEx58* alone. Relative expression of each gene was normalized by the average expression value of that gene across all samples in the experiment.
