FIGURE S2  Phenotypes of tfg2 alleles in combination with Pol II alleles. A. Inability of tfg2 alleles to rescue lethal LOF Pol II alleles detected by growth of double mutants on 5FOA (see Methods and Materials for details). B. Serial dilutions of viable tfg2/rpo21 (rpb1) double mutant alleles on various media for phenotyping of genetic interactions (general growth, temperature sensitivity, MPA, Gal and Spt phenotypes). LOF Pol II alleles are marked by blue bar, GOF by green. Heatmap presentation of phenotype quantifications of this assay is shown in Figure 2C.
