Figure S2  Comparison of CIN gene hits from screens in this and published studies

a-d. Published dcCIN datasets were from Strome et al. 2008\cite{Strome2008} and Choy et al. 2013\cite{Choy2013}. And published deletion or conditional CIN genes were from Stirling et al. 2011\cite{Stirling2011}. Because different screens included different sets of yeast genes, only hits from the common-screened genes are subjected to this analysis.
