

## Corrigendum

In the article by R. E. Zordan, Y. Ren, S.-J. Pan, G. Rotondo, A. De Las Peñas, *et al.* (*G3: Genes|Genomes|Genetics* 3: 1675–1686) entitled “Expression Plasmids for Use in *Candida glabrata*,” a set of nucleotide coordinates in the *Plasmid construction* section of *Materials and Methods* has been modified.

In the second paragraph of the *Plasmid construction* section, the third sentence read:

The ARS sequence was functionally isolated from *C. glabrata* strain BG2 and corresponds to nucleotides 954976–955403 of chromosome F in the published *C. glabrata* CBS138 sequence.

The corrected sentence now reads:

The ARS sequence was functionally isolated from *C. glabrata* strain BG2 and corresponds to nucleotides 286060–286210 of chromosome F in the published *C. glabrata* CBS138 sequence.
