

## About G3

G3: *Genes | Genomes | Genetics* (ISSN 2160-1836) is an open-access, peer-reviewed and peer-edited journal published monthly by the Genetics Society of America (GSA). The journal seeks to serve the genetics community by providing an outlet for dissemination of findings and experimental resources in genetics and genomics—an outlet unrestricted by subjective editorial criteria of perceived significance or predicted breadth of interest. G3 is interested in publishing papers that describe useful, well-executed and lucidly-interpreted genetic studies of all kinds, from those involving microbes to humans, from individuals to populations, and from classic “wet lab” experimentation to the most recent innovations in bioinformatics.

Through a fair and rapid peer-review and publication process, G3 seeks to provide a unified home for reporting genome sequences, genetic and physical maps of organisms, mutant screens, QTL mapping, genome wide association studies, as well as many other important and useful datasets. The GSA through G3 recognizes its responsibility to enable documentation of reagents and resources, descriptions of high-quality foundational work in developing areas of genetics, and datasets for meta-analysis, to name a few.

Publication is open equally to members and nonmembers of the GSA. G3's articles are distributed under the terms of the Creative Commons Attribution Unported License (<http://creativecommons.org/licenses/by/3.0/>), which permits unrestricted use, distribution, and reproduction in any medium, provided the original work is properly cited. For more information, please refer to our Instructions for Authors or contact the Editorial Office.

## About the Cover

Illustration of *Neurospora* ascospores in the shape of a clock to signify the influence of *N. crassa* on circadian rhythm research. Original photo of the ascospores courtesy of Mukund Ramakrishnan. C. E. Ruesch et al., pp. 93–101.

### Editor-in-Chief

Brenda Andrews  
 University of Toronto

### Deputy Editor, Complex Traits

Dirk Jan de Koning  
 Swedish University of Agricultural Sciences

### Deputy Editor, Human Genetics

Stephen W. Scherer  
 The Hospital for Sick Children & University of Toronto

### Executive Editor

Tracey DePellegrin Connelly

### Editorial Board

Eduard Akhunov  
 Kansas State University

Danika L. Bannasch  
 University of California, Davis

Judith Berman  
 University of Minnesota & Tel Aviv University

James A. Birchler  
 University of Missouri

Charles Boone  
 University of Toronto

Michael Boutros  
 DKFZ & University of Heidelberg

Rachel Brem  
 Buck Institute for Research on Aging

David T. Burke  
 University of Michigan Medical School

Rita M. Cantor  
 University of California, Los Angeles

Susan Celniker  
 Lawrence Berkeley National Laboratory

Aravinda Chakravarti  
 Johns Hopkins University School of Medicine

J. Michael Cherry  
 Stanford University

Timothy J. Close  
 University of California, Riverside

Barak A. Cohen  
 Washington University School of Medicine

Josep M. Comeron
