

Figure S2 Neighbor-joining tree of *ZRT1* and adjacent genes *ADH4* and *FZF1*. Neighbor-joining trees of *ZRT1* and the two adjacent genes *ADH4* and *FZF1* with bootstrap values greater than 90% (in gray) and rooted to *S. paradoxus*. *S. cerevisiae* strains are color coded by class (see legend). The strains represented in each tree are identical except strain IL01 is missing for the gene *ADH4*.
