

Figure S1 Replicates of arrays for each concentration. Scatter plot depicting fluorescence intensities of each probe in array replicates for different GABP α concentration and GABP α :CREB1 concentration: (A) 2.5ng of GABP α -GST; (B) 2.5ng GABP α -GST plus 2.5ng CREB1; (C) 8ng of GABP α -GST; (D) 8ng GABP α -GST plus 8ng CREB1; (E) 30ng of GABP α -GST; (F) 30ng GABP α -GST plus 30ng CREB1.
